Maxwell X. Moore

mxmoore@usf.edu (813) 727-6942

Portfolio: https://portfolio-maxwell-moore.netlify.app/ | LinkedIn: https://www.linkedin.com/in/maxwell33/

Education

Bachelor of Science in Computer Science, University of South Florida, Tampa, FL — Expected May 2028

GPA: 3.7 / 4.0

Skills

TECHNICAL SKILLS

Languages: Python, JavaScript, C++, C

Web: HTML, CSS, REST APIs

Tools: Git, GitHub, Arduino IDE, Excel

SOFT SKILLS: Time Management, Interpersonal skills, Presentation Skills

Projects

Posture Guard – Hackathon Winner (HackaBull VII) (React, JS, Tailwind CSS, MediaPipe) — April 2026

- Developed a Chrome extension using real-time pose detection to monitor user posture through webcam input.
- Implemented on device pose processing, ensuring user privacy with zero external data transmission
- Designed features to detect slouching, track posture habits, and provide **real-time feedback** and alerts.
- Built a dashboard to visualize posture metrics and trends, including session duration and behavior tracking.
- Utilized **MediaPipe** and **JavaScript** to calculate ear-neck-shoulder angles for posture classification and real-time feedback

Interactive Web Application – (REST API, JS, HTML/CSS) — April 2026

- Built interactive web application with HTML, CSS, JavaScript that integrates with external REST API
- Implemented POST/GET requests to persist user data and state across sessions
- Designed user authentication system to track individual FizzBuzz progress and game state
- Diagnosed API response errors (HTTP status codes) to identify and resolve data persistence issues
- Designed application architecture to ensure reliable data persistence and consistent session state management across user interactions

Arduino Robot – Software Lead (Team Project) (C++) — September 2024 – November 2024

- **Programmed** and integrated an autonomous object-tracking robot utilizing **C++**, delivering a functional prototype under a **$40 budget** with **95% target detection accuracy**.
- Assisted with **hardware setup**, **testing**, and design improvements to enhance performance and ensure consistent, low-cost functionality.

Work Experience

Entreken Associates Inc– AI integration intern — October 2026 to present

- Engineered custom **Microsoft Copilot agents** and automated workflows to accelerate commercial real estate appraisal review and error detection.
- Collaborated on **deploying internal AI tools** and standard operating procedures to reduce manual report review time while maintaining valuation compliance.

Leadership

- SHPE Newsletter Director, USF — September 2025 to May 2026

Honors & Awards

- Florida Bright Futures Scholarship Medallion Scholars
- USF Directors Scholarship
- USF Deans list fall semester 2024
